

Professional Summary

Artificial Intelligence undergraduate with knowledge of Python, C++, and Java, and a strong foundation in programming and problem-solving. Focused on building industry-ready technical skills through academic projects, continuous learning, and a disciplined approach to software development.

Education

- **BTech(AI)** | GH Raisonni College of Engineering, Nagpur 2027|9.62 CGPA
- **HSC** | Govt. Model Hr. Sec. School, Batote 2023|83.2%
- **SSC** | Govt. Model Hr. Sec. School, Batote 2021|93.6%

Academic Projects

**Real Time Face Detection-A comprehensive System** (3 members) 6 months

- Built a real-time face detection system to predict gender, age group, and emotions from live video.
- Used Python, OpenCV, DeepFace, FER, Haar Cascade, and NumPy.
- Strengthened problem-solving, teamwork, time management, and documentation skills.

**Bank Management System (Spring Boot)** (Individual) 1 month

- Built a secure backend system for managing banking operations with role-based access.
- Learned enterprise architecture, secure APIs, and real-world transaction handling.
- Java, Spring Boot, Spring Security, JWT, MySQL, REST, Git.
- Problem solving, logical thinking, time management, self-learning.

Technical Skills

- **Programming:** Python | Java | C | C++ | HTML
- **Data & Databases:** SQL | Data Analysis (Basics) | Data Processing
- **AI & Machine Learning:** Machine Learning Fundamentals | Face Detection | Emotion Recognition
- **Libraries & Tools:** OpenCV | NumPy | DeepFace | FER | Git | GitHub | Arduino IDE
- **Core CS Concepts:** Object-Oriented Programming | Data Structures & Algorithms | Problem Solving
- **Systems & Exposure:** IoT Systems | Sensor Interfacing | Real-time Video Processing

Academic Rewards

- Secured First Rank (Class Topper) in the 1st year of B.Tech.
- Achieved Second Rank (Branch 2nd Topper) in the 2nd year of B.Tech.
- Currently holds the highest cumulative CGPA in the branch (up to 5 semesters).

Certifications
